Clear Acrylic Coated Galvalume® coating is subject to variances in spangle from coil to coil which may result in noticeable shade variation in installed panels. Clear Acrylic Coated Galvalume® coating is also subject to differential weathering after panel installation. Panels may appear to be different shades due to this weathering characteristic. If a consistent appearance is required, SBS recommends that pre-painted panels be used in lieu of Clear Acrylic Coated Galvalume®. Shade variation in panels manufactured from Clear Acrylic Coated Galvalume® coated material do not diminish the structural integrity of the product. These shade variations should be anticipated and are not a cause for rejection.

### Panel Pricing Notes:
1. GALVALUME® base metal is in conformance with ASTM A792 Grade 80, Coating Class AZ55 if bare, Coating Class AZ50 if painted.
