PANEL INFORMATION

HOW TO CALCULATE SQUARES OF PANELS:

One square = 100 square feet of panels

All of the panels on Page CIP-2 are calculated identically, based on a panel width of 38-1/4" (not the panel coverage width of 36" after lapping). So, for every LFT of panel, there is 3.1875 square feet.

To calculate squares, first calculate the total LFT of all of the panels. For example, if there are 40 panels @ 16'-0" long, there would be a total panel LFT amount of 640.

Next, multiply the 640 LFT by the 3.1875 Square Feet in each LFT of panel. This totals to 2,040 Square Feet. Then, simply divide the 2,040 SF by 100 (Square Feet in a Square) and this equals a total of 20.4 squares.

The 6.8 Panel on Page CIP-3 is based on a panel width of 37” (not the panel coverage width of 34” after lapping). So, for every LFT of panel, there is 3.0833 square feet.

To calculate squares, first calculate the total LFT of all of the panels. For example, if there are 40 panels @ 16’-0” long,there would be a total panel LFT amount of 640.

Next, multiply the 640 LFT by the 3.0833 Square Feet in each LFT of panel. This totals to 1,973.31 Square Feet. Then, simply divide the 1,973.31 SF by 100 (Square Feet in a Square) and this equals a total of 19.73 squares.

PANEL PRODUCT INFORMATION:

1. Clear Acrylic-Coated GALVALUME®:
   a. Clear Acrylic-Coated GALVALUME® incorporates a thin, non-warranted clear acrylic film intended to increase its resistance to fingerprinting and handling marks during the erection process as well as eliminating the need for using oil in the forming process. This clear acrylic film could discolor during the weathering process. This is not a cause for rejection.
   b. Clear Acrylic-Coated GALVALUME®'s metallic coating spangle appearance and shade could vary from coil-to-coil and may be noticeable during or after erection or during the weathering process. This is not a cause for rejection.
   c. Neither of the aforementioned aesthetic issues diminish the structural integrity nor affect the limited panel warranty. If a consistent appearance is a priority, SBS recommends that pre-painted panels be used in lieu of Clear Acrylic-Coated GALVALUME®
2. Painted Finish Panels:
   a. The top coat paint thickness is a nominal 1.0 mils (+/- 0.2 mils) inclusive of the primer.
   b. The off-white backer coat paint thickness is a nominal 0.5 mils (+/- 0.1 mils) inclusive of the primer.
3. “A” Panels are produced in the Hockley, TX location only. All “A” Panels have striations.
4. All panels have a length tolerance of plus or minus 1/4" from ordered length.
5. Maximum panel length is 52'-0". Longer lengths are possible but may require a higher cost, permitted delivery. Please inquire.

PANEL PERFORMANCE WARNINGS

The building panels are manufactured to the highest quality standards, offering long-term durability and performance. To assure optimum panel performance, special precautions must be taken while the panels are in a packaged state. Please take notice of the followings WARNINGS to insure that your panels are properly protected prior to installation and installed properly. Failure to follow these recommendations could void any panel warranty.

A. JOBSITE STORAGE

1. All building panels are extremely vulnerable to finish deterioration from moisture when in the nested, packaged condition. Long term storage of these panels (over 30 days) in the nested, packaged condition can be detrimental and may void the panel finish warranty. Erect panels immediately upon receipt for best results.
2. Moisture can form between dry panels from temperature changes alone. This can happen even when kept undercover, out of the elements, and especially in winter. It is very important to install all panels as soon as possible.
3. Job site storage is the responsibility of the buyer and should always include tarping and the elevation of one end of every panel package to aid in the draining of any moisture that may accumulate between panels. Panels should always be stored above rising water levels.
4. Panels with evidence of water stain, paint blistering or other defects attributed to improper or long term field storage will not be eligible for claim.

PANEL INFORMATION

PANEL PERFORMANCE WARNINGS (Continued)

B. INSTALLATION

1. All metal shavings or iron filings created during the erection process by drilling holes, cutting, or sawing must be swept off of the roof and wall panels daily. Failure to do so may cause permanent rust stains on the painted surface. Claims will not be accepted for this problem.
2. Cutting of panels or trim with circular saws is strongly discouraged. The fine metal particles created are hot and will embed themselves into any painted surface they contact. Removal of all of these particles is nearly impossible and will cause rust spots on the painted surfaces. This problem occurs most when cutting endwall panels to slope or cutting around wall openings. Claims will not be accepted for this problem.
3. All panels should be installed in a manner that the bottom cut edge of the panels is at least ¼" above any direct contact with the concrete recess. The lime in the concrete will react with the aluminum in the GALVALUME® coating and cause coating failure and edge rust. Claims will not be accepted for this problem.
4. Never cut the blanket insulation off even with the edge of the panels as this will cause “wicking” of moisture and will promote panel rust. Always fold back the insulation, with facing outward, at least 1" away from the panel edge.

PANEL INSTALLATION SAFETY WARNINGS

1. These panels should be installed by a qualified professional that is knowledgeable with the proper installation of metal building panels and the safety precautions required.
2. Never install panels without wearing a tied-off safety harness and/or using a safety net as required by OSHA.
3. Painted panels are coated with a wax to protect the painted surface during shipment. All panels should be viewed as extremely slippery, even if dry.
4. Never install or walk on wet building panels. Panels become extremely slippery when wet and could cause slippage or injury.
5. Take extreme care when walking on panels early in the morning as morning dew could be present and cause panels to be extremely slippery.
6. Never install panels in inclement weather (i.e. ice, snow, rain, lightning, etc.) as slippage or injury could occur.
7. All sloped roofs are dangerous. Be extremely careful when working on any sloped roof to avoid slipping or loss of balance.
8. Never install panels on windy days. Installers may be subject to injury if wind gusts cause them to lose their balance while carrying panels.
9. Be extremely careful installing panels (or any other steel or metal items) near electrical lines as these panels or items will conduct electricity and could cause electrocution.
10. Never walk on the top panel of an unsecured package of panels. The top panel will slide easily and may cause a fall and/or injury.
11. Never leave a bundle of panels unsecured on the sloped roof of a structure. The panels could slide off the roof like a “deck-of-cards” causing injury to those on the ground.
12. Always handle panels with care as all panel edges are sharp and can easily cause injury. Whenever possible, use gloves when handling.

ZEE & CEE PUNCHING PRICE NOTES AND INFORMATION

All common patterns have the first set of holes 1¾" from the end of the section.
Punch Pattern A: Web Punch (for Simple Span, Short Lap, Long Lap, 3' Offset and Max Lap).....$1.00 per zee or cee
Punch Pattern B: Web Punch (all laps available in Pattern A plus 5' Offset and Super Lap) .....$1.20 per zee or cee
Punch Pattern G: Web End Punch (one set of holes 1¾" from end of section).....$0.55 per zee or cee
Punch Pattern S: Web End Punch (Two sets of holes 1 3/4" and 5-3/4" from end of section.) .....$0.75 per zee or cee
SPECIAL PUNCHING: SP8: 8 Stops or Less.....$1.75 per zee or cee
SP9: 9 Stops or More .....$2.50 per zee or cee

GENERAL PRICING / INFORMATION – (APPLIES TO PAGES CIP-5 - CIP-8)

1. The Red-Oxide members conform to ASTM A1011, Grade 55 (55,000 PSI min. yield). The red-oxide finish meets or exceeds the performance characteristics of SSPC Paint No. 15, having a 0.5 mil nominal film thickness and is designed for short-term field protection during the erection process.
2. All Galvanized members conform to ASTM A653, Grade 55 (55,000 PSI Yield), G60 Coating Class. Surface oxidation is possible and is NOT a cause for rejection.
3. Length tolerance is ±¼".
4. For pricing, round lengths up to the nearest 3" increment - Section lengths less 5'-0" are priced as minimum 5'-0" length.

21 15/16"	14 12	5.25# 7.84#	$16.20 $23.50	$20.30 $30.20

PRICE YOUR OWN CUSTOM STRUCTURAL SHAPES:

1. Select the strip width of material to be used.
2. Add $0.25 per foot for each break.
3. Pricing includes banding material for shipment.

NOTES:

1. Maximum closed angle is 45 degrees.
2. Hems cannot be fabricated.
3. Slight metal fracturing may occur at bend lines.
4. Minimum break dimension is 1⅛".
5. Maximum part length will vary depending on shape desired.

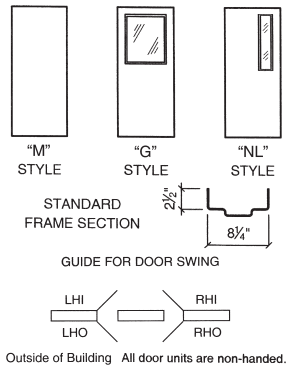
ACCESSORIES

STANDARD PERSONNEL DOOR UNITS

100 MPH Wind-Rated - Non-Labeled

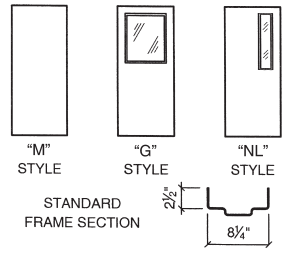


DESCRIPTION			PRICE PER UNIT
DOOR SIZE	STYLE	WT./UNIT	WHITE FINISH
3070 (single leaf)	"M"	166#	$610.00
3070 (single leaf)	"G" or "NL"	161#	$730.00
4070 (single leaf)	"M"	190#	$825.00
4070 (single leaf)	"G" or "NL"	185#	$945.00
6070 (double leaf)	"M"	265#	$1235.00
6070 (double leaf)	"G" or "NL"	255#	$1475.00

Single leaf door unit includes: 20ga. embossed surface, polyurethane R11 insulated leaf, 16ga. Kerf frame with integral weather strip, assembly bolts, plain bearing hinges and threshold.
Double leaf door unit includes: two surface bolts, right handed astragal in addition to the items listed for the single leaf unit.
Glass and glazing is not included on "G" or "NL".
ADA regulations require lever lockset for public access buildings.

WIND-RATED DOOR UNITS

Design Pressure +/- 50 (145 MPH Wind-Rated) - Labeled Leaf & Frame



All Wind-Rated Door Units must be installed as an out-swing unit.

SPECIAL ORDER ONLY - 5 to 7 Working Days.

DESCRIPTION			PRICE PER UNIT
DOOR SIZE	STYLE	WT./UNIT	WHITE FINISH
3070 (single leaf)	"M"	166#	$740.00
3070 (single leaf)	"G" or "NL"	161#	$860.00

3070 single leaf door unit includes: 20ga. embossed finish, polyurethane R11 insulated leaf, 16ga. Kerf frame with integral weather strip, assembly bolts, plain bearing hinges, (2) sets of girt attachments and threshold.

4070 (single leaf)	"M"	190#	$1015.00
4070 (single leaf)	"G" or "NL"	185#	$1140.00

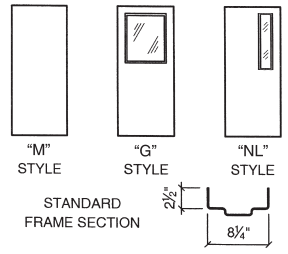
6070 double leaf door unit includes: 18ga. smooth finish, polyurethane R11 insulated leaf, 16ga. Kerf frame with integral weather strip, assembly bolts, plain bearing hinges, (2) sets of girt attachments, (2) surface bolts, right handed astragal and threshold.

6070 (double leaf)	"M"	265#	$1670.00
6070 (double leaf)	"G" or "NL"	255#	$1783.00

4070 Single leaf door unit includes: 18ga. smooth finish, polyurethane R11 insulated leaf, 16ga. Kerf frame with integral weather strip, assembly bolts, plain bearing hinges,(2) sets of girt attachments, and threshold.
Glass and glazing is not included on "G" or "NL".
ADA regulations require lever lockset for public access buildings.
Single Leaf Door units must use:
Grade 1 Heavy Duty Lever Cylindrical or Mortise Locket, or
Grade 1 Rim or Mortise Lever Panic Device.
6070 Double Leaf Door units must use:
Grade 1 Heavy Duty Lever Mortise Locket.
Panic Device use requires special 16ga. leaves. Please inquire for price and availability.
Impact Rated Glass (supplied by others) must be installed in all openings for glass in order to maintain proper design pressure rating.

HURRICANE DOOR UNITS

Design Pressure +/- 75 (170 MPH Wind-Rated) - Labeled Leaf & Frame



All Hurricane Door Units must be installed as an out-swing unit.

SPECIAL ORDER ONLY - 5 to 7 Working Days.

DESCRIPTION	PRICE PER UNIT
Standard 100mph Door Leaves: 20ga embossed surface, polyurethane R11 core	WHITE FINISH
3070 “M” Door Leaf	$347.00
3070 “G” or “NL” Door Leaf (Glass and glazing not included)	$467.00
4070 “M” Door Leaf	$492.00
4070 “G” or “NL” Door Leaf (Glass and glazing not included)	$612.00
Standard 100mph 16ga. Kerf Single Leaf Door Frame Package Includes: frame with integral weather strip, assembly bolts, plain bearing hinges, threshold and door sweep.	
3070 Frame, 8¼" Depth	$263.00
4070 Frame, 8¼" Depth	$333.00
Standard 100mph 16ga. Kerf Double Leaf Door Frame Package Includes: frame with integral weather strip, assembly bolts, plain bearing hinges, surface bolts, right handed astragal, threshold and door sweep.	
6070 Frame, 8¼" Depth	$541.00
Handed Astragal (specify leaf attaching to)	$118.00
Lock Hole Filler Plate (used on inactive leaf)	$12.50
Surface Bolt, US26D (2 required per leaf)	$23.75
Thru-Mounted, Hydraulic, Size IV Door Closer	$185.00
Aluminum Threshold (ADA) ½" high. (includes anchors, screws, and sweep)	
3'-0"	$36.00
4'-0"	$47.00
6'-0"	$70.50
Full Mortise Hinges, 4½" x 4½" Steel, US26D, Non-Removable Pins, (3/Box)	
Plain Bearing	$31.50
Ball Bearing	$42.75
Grade 2 Knob Type Cylindrical Lockset, US26D	$75.00
Grade 2 Lever Type Cylindrical Lockset, US26D (ADA)	$75.00
Grade 1 Lever Type Cylindrical Lockset, US26D (ADA)	$175.00
Grade 1 Mortise Lever Lockset, (function 86A), US26D (requires a specially prepared leaf) (ADA)	$355.00
Grade 2 Surface Mounted Reversible Rim Panic Device, US26D (has keyed lever for exterior entry) (ADA)	$345.00
Grade 1 Surface Mounted Reversible Rim Panic Device, US26D (has keyed lever for exterior entry) (ADA)	$520.00
Removable Mullion (Must be used on double leaf door when using Rim Panic Device), gray only	$440.00
Double Cylinder Dead Bolt, US32D, (lock only, door prep charges not included)	$75.00
Single Cylinder Dead Bolt with Thumb-Turn, US32D, (lock only, door prep charges not included)	$45.00
Dead Bolt Preparation Charges for Door Leaf and Frame (this hands leaf and frame)	$113.00
Keyed Alike Charge, per Lock	$15.00

SPECIAL TRIM PRICING

FORMULA FOR PRICING SPECIAL TRIM

Use the following formula to calculate the Price Per Foot of Trim:

Girth of Material x Price per Inch of Girth + Price per Number of Breaks

Price per Inch of Girth	- 26ga. Acrylic Coated GALVALUME®	~	$0.24
	- 26ga. SMP Standard Colors	~	$0.32
	- 26ga. KYNAR Standard Colors	~	$0.37 (See Page CIP-26 for Limited Color Selections)
	- 24ga. Acrylic Coated GALVALUME®	~	$0.27
	- 24ga. SMP Standard Colors	~	$0.36 (See Page CIP-26 for Limited Color Selections)
	- 24ga. KYNAR Standard Colors	~	$0.43
	- 22ga. Acrylic Coated GALVALUME®	~	$0.42
Price per Break (Hem equals two breaks)		~	$0.14

1. All trim to be 26 gauge material unless noted otherwise on customer drawing or sketch.
2. Customer drawing or sketch of special trim must be in our possession for order to be processed.
3. Specify the side with the finish color.
4. If more than one special trim is required, number each piece SF1, SF2, SF3, etc.
5. Tapered trim requirements: $15.00 Set-Up charge per section - NO EXCEPTIONS. Drawings must be furnished by customer and be "shop ready".
6. 5'-0 minimum length will be charged.

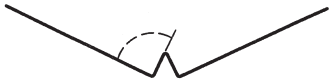
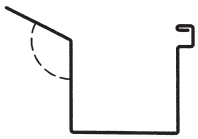
ANGLE CHART FOR ROOF LINE TRIM

Hip

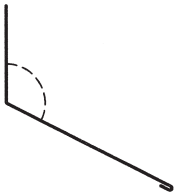


Valley

Ridge



Gutter



Transition

Inside

	Roof Slope											
	1:12	2:12	3:12	4:12	5:12	6:12	7:12	8:12	9:12	10:12	11:12	12:12
Hip	173°	166°	160°	154°	148°	143°	138°	133°	129°	126°	123°	120°
Valley	117°	113°	110°	107°	104°	102°	99°	97°	95°	93°	92°	90°
Ridge	170°	161°	152°	143°	135°	127°	120°	113°	106°	100°	95°	90°
Gutter and Transition	94°	99°	104°	108°	112°	116°	120°	123°	126°	129°	132°	135°
Inside	86°	81°	76°	72°	68°	64°	60°	57°	54°	51°	48°	45°

This chart assumes the roof slopes are the same on both sides of the hip, valley, or ridge line.
Contact your salesperson if the roof slopes are different.
